

CREATIVE DIGITAL KEY PHONE DT-830

Creative DIGITAL key Phones work on single twisted pair of telephone cable and carries Data, Voice and power. All the models are designed with multiple DSS keys and offer superior voice quality. The key phones not only offer ease of operation to the operator or user and gives the option to answer more important incoming calls. Since caller identification and calls in queue are visible, the correct priority can be assigned to most important and sensitive call.

Creative DT- 830
